

Ken's Trip

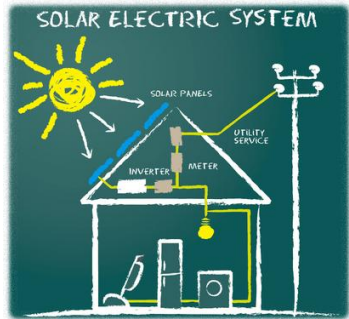

DIRECTIONS: Read and circle any unfamiliar words, Including the vocabulary words from the right

Hi I'm Ken! Today, my class and I came to the solar decathlon competition. It is a fun and hard competition that happens twice a year. This event first started in 2002.

DID YOU KNOW?

The Solar Decathlon allows visitors to look around these very efficient houses, gather ideas to use in their own homes, and learn how they can save energy and reduce power bills

Students from different schools design houses powered by the sun. The sun powers solar panels with sunlight. Sunlight is a form of solar energy which people use.

VOCABULARY*

*MAKE SURE YOU KNOW THESE TERMS

sun- the star that Earth circles

solar energy- light and heat from sun used

solar panels- how we save energy from sun

sunlight- light that comes from the sun
